LEGAL & GENERAL LONG LIFE FUND

Investment Objective

The Legal & General Long Life Fund (the “Fund”) seeks to provide capital growth while limiting downside risk.

Fund Fees and Expenses

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may be required to pay commissions and/or other forms of compensation to a broker for transactions in shares of the Fund, which are not reflected in the table or the example below.**

Shareholder Fees (fees paid directly from your investment)

	W Shares	Institutional Shares	R6 Shares
Redemption Fee (as a percentage of amount redeemed, if shares redeemed have been held for less than 30 days)	2.00%	2.00%	2.00%

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	W Shares	Institutional Shares	R6 Shares
Management Fees	0.15%	0.15%	0.15%
Other Expenses ¹	<u>0.76%</u>	<u>0.81%</u>	<u>0.86%</u>
Shareholder Servicing Fees	0.10%	0.15%	0.20%
Other Operating Expenses	0.66%	0.66%	0.66%
Acquired Fund Fees and Expenses (AFFE) ²	<u>0.15%</u>	<u>0.15%</u>	<u>0.15%</u>
Total Annual Fund Operating Expenses	1.06%	1.11%	1.16%
Less Fee Reductions and/or Expense Reimbursements ³	<u>(0.91)%</u>	<u>(0.91)%</u>	<u>(0.91)%</u>
Total Annual Fund Operating Expenses after Fee Reduction and/or Expense Reimbursement	0.15%	0.20%	0.25%

¹ Other Expenses are based on estimated amounts for the current fiscal year.

- ² AFFE are indirect fees and expenses that the Fund incurs from investing in shares of other mutual funds, including money market funds and exchange-traded funds, and are estimated for the current fiscal year.
- ³ Legal & General Investment Management America, Inc. (the “Adviser” or “LGIMA”) has contractually agreed to waive fees and reimburse expenses to the extent necessary to keep Total Annual Fund Operating Expenses (excluding interest, taxes, brokerage commissions and other costs and expenses relating to the securities that are purchased and sold by the Fund, Acquired Fund Fees and Expenses, other expenditures which are capitalized in accordance with generally accepted accounting principles, and other non-routine expenses (collectively, “excluded expenses”)) from exceeding 0.00%, 0.05% and 0.10% of the Fund’s average daily net assets of the W Shares, Institutional Shares and R6 Shares, respectively, until February 28, 2024 (the “contractual expense limits”). In addition, the Adviser may receive from the Fund the difference between Total Annual Fund Operating Expenses (not including excluded expenses) and the contractual expense limits to recoup all or a portion of its prior fee waivers or expense reimbursements made during the rolling three-year period preceding the date of the recoupment if at any point Total Annual Fund Operating Expenses (not including excluded expenses) are below the contractual expense limits (i) at the time of the fee waiver and/or expense reimbursement and (ii) at the time of the recoupment. This reimbursement agreement may be terminated: (i) by the Board of Trustees (the “Board”) of The Advisors’ Inner Circle Fund III (the “Trust”), for any reason at any time; or (ii) by the Adviser, upon ninety (90) days’ prior written notice to the Trust, effective as of the close of business on February 28, 2024.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses (including one year of capped expenses in each period) remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years
W Shares	\$15	\$225
Institutional Shares	\$20	\$241
R6 Shares	\$26	\$256

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in total annual Fund operating expenses

or in the example, affect the Fund's performance. Because the Fund has not commenced investment operations as of the date of this prospectus, it does not have portfolio turnover information to report.

Principal Investment Strategies

The Fund seeks to achieve its investment objective primarily by investing in other mutual funds for which the Adviser also serves as investment adviser ("LGIMA Underlying Funds"), with a target asset allocation strategy that emphasizes investments in equity securities (and certain other instruments described below) in an amount equal to 60% of its assets and exposure to fixed-income securities in an amount equal to 40% of its assets. The Fund's equity component will also utilize an option collar strategy to attempt to mitigate losses in downward market cycles, as described in greater detail below.

The Fund's target asset allocation may differ from the Fund's actual asset allocation. These allocations will be reviewed periodically throughout the year to ensure any significant changes to the Adviser's market outlook are incorporated into the asset allocation. For example, the Adviser may seek to increase allocations to the equity asset class if the Adviser determines that such change will help achieve the Fund's return target in any given year, provided the Adviser believes that any additional portfolio risk from such increased allocation is appropriate and in line with the Adviser's then-current market assumptions, including estimates of expected market volatility and correlation across underlying assets. On the other hand, the Adviser may seek to increase allocations to the U.S. fixed income asset class to, for example, attempt to decrease volatility and preserve capital.

With respect to its equity investments, the Fund will invest primarily in the Legal & General Global Developed Equity Index Fund (the "Index Fund") to passively track exposure to the securities included in the MSCI World Index, the Index Fund's primary benchmark index. Through its investments in the Index Fund, the Fund may gain exposure to equity securities, equity exchange-traded funds ("ETFs"), equity futures and/or equity swaps, including total return swaps. The Fund expects to gain exposure to derivatives that are primarily entered into on U.S. exchanges but may also be exposed to derivative transactions conducted outside of the U.S. In addition to its investments in the Index Fund, the Fund may also invest directly in ETFs and options for liquidity management purposes.

The Fund will also utilize an option collar strategy as an overlay to the entirety of the Fund's equity allocation. The Adviser expects that the

option collar strategy will be utilized continuously in connection with its equity allocation. The purpose of the Fund's option collar strategy is to "hedge" or mitigate the risk of losses in downward market cycles associated with owning equity securities. This strategy will involve (i) selling covered call options on equity securities held indirectly by the Fund to generate premium from such options, while (ii) simultaneously purchasing put options on the same underlying equity securities held indirectly by the Fund. The optimal reference holdings for the option collar strategy are identified by utilizing references that are assigned the same exposure (i.e. by region and market capitalization) as the exposure held through the Index Fund, with consideration given to the liquidity of such related instruments. In other words, the Fund will use references for the option collar strategy that directly align with the Fund's exposure held through the Index Fund. The Fund may also invest in total return swaps to gain the same or similar investment exposure as the option collar strategy.

With respect to its fixed income investments, the Fund will invest primarily in the Legal & General Long Duration U.S. Credit Fund (the "U.S. Credit Fund") to provide overall diversification for the Fund's portfolio. Through its investments in the U.S. Credit Fund, the Fund may gain exposure to fixed income securities such as securities issued or guaranteed by the U.S. Government and its agencies or instrumentalities, municipal bonds, corporate bonds, supranational issuers (including emerging market issuers), asset-backed securities and mortgage-backed securities. In constructing the fixed income component of the Fund's portfolio through exposure to the U.S. Credit Fund, the Adviser's fixed income research analysts perform in-depth fundamental analysis and emphasize the following areas of focus in the research process: developing proprietary earnings models, forecasting free cash flow, analyzing asset valuations, and meeting with management. The Fund generally does not expect to hold any fixed income securities directly as part of its principal investment strategies.

Principal Risks

As with all mutual funds, there is no guarantee that the Fund will achieve its investment objective. You could lose money by investing in the Fund. **A Fund share is not a bank deposit and it is not insured or guaranteed by the Federal Deposit Insurance Corporation ("FDIC") or any other government agency.** Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears. Different risks may be more significant at different times depending on market conditions or other factors.

Asset Allocation Risk — The Fund is subject to asset allocation risk, which is the risk that the selection of the Underlying Funds and the allocation of the Fund's assets among the various asset classes and market segments will cause the Fund to underperform other funds with a similar investment objective. The value of an investment in the Fund is based primarily on the prices of the Underlying Funds in which the Fund invests. In turn, the price of each Underlying Fund is based on the value of its assets. The ability of the Fund to meet its investment objective is directly related to its asset allocation among the Underlying Funds and its direct investments and the ability of the Underlying Funds to meet their investment objectives and for the direct investments to perform positively. If the Adviser's asset allocation strategy does not work as intended, the Fund may not achieve its objective.

Investment in Underlying Funds Risk — The value of an investment in the Fund is based primarily on the prices of the Underlying Funds in which the Fund invests. In turn, the price of each Underlying Fund is based on the value of its assets. The Fund, and thus its shareholders, bears its own direct expenses in addition to bearing a proportionate share of expenses of the Underlying Funds, which may make owning shares of the Fund more costly than owning shares of the Underlying Funds directly. Before investing in the Fund, investors should assess the risks associated with the Underlying Funds and the types of investments made by those Underlying Funds. These risks include any combination of the risks described below, although the Fund's exposure to a particular risk will be proportionate to the Fund's overall asset allocation and Underlying Fund allocation.

Market Risk — The prices of and the income generated by the Fund's securities may decline in response to, among other things, investor sentiment, general economic and market conditions, regional or global instability, and currency and interest rate fluctuations. In addition, the impact of any epidemic, pandemic or natural disaster, or widespread fear that such events may occur, could negatively affect the global economy, as well as the economies of individual countries, the financial performance of individual companies and sectors, and the markets in general in significant and unforeseen ways.

Equity Market Risk — The risk that stock prices will fall over short or extended periods of time, sometimes rapidly and unpredictably. The value of equity securities will fluctuate in response to factors affecting a particular company, as well as broader market and economic conditions. Broad movements in financial markets may adversely affect the price of the Fund's investments, regardless of how well the companies in which the Fund invests perform. Moreover, in the event of a company's

bankruptcy, claims of certain creditors, including bondholders, will have priority over claims of common stock holders such as the Fund.

Fixed Income Market Risk – The prices of the Fund’s fixed income securities respond to economic developments, particularly interest rate changes, as well as to perceptions about the creditworthiness of individual issuers, including governments and their agencies. Generally, the Fund’s fixed income securities will decrease in value if interest rates rise and vice versa. In a low interest rate environment, risks associated with rising rates are heightened. Declines in dealer market-making capacity as a result of structural or regulatory changes could decrease liquidity and/or increase volatility in the fixed income markets.

Derivatives Risk – Futures contracts, options and swaps are subject to market risk, leverage risk, correlation risk and liquidity risk. Liquidity risk and market risk are described elsewhere in this section. Many over-the-counter (“OTC”) derivative instruments will not have liquidity beyond the counterparty to the instrument. Leverage risk is the risk that a small percentage of assets invested in derivatives can have a disproportionately larger impact on the Fund’s performance. Correlation risk is the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index. Forward contracts and swap agreements are also subject to counterparty credit risk and valuation risk. Valuation risk is the risk that the derivative may be difficult to value and/or may be valued incorrectly. Counterparty credit risk is described elsewhere in this section. Each of these risks could cause the Fund to lose more than the principal amount invested in a derivative instrument. Some derivatives have the potential for unlimited loss, regardless of the size of an initial investment. The other parties to certain derivative contracts present the same types of credit risk as issuers of fixed income securities. The use of derivatives may also increase the amount of taxes payable by shareholders. Both U.S. and non-U.S. regulators have adopted and implemented regulations governing derivatives markets, the ultimate impact of which remains unclear.

Collared Options Strategy Risk – Writing and buying options are speculative activities and entail greater than ordinary investment risks. The Fund’s use of call and put options can lead to losses because of adverse movements in the price or value of the reference asset, which may be magnified by certain features of the options. When selling a call option, the Fund will receive a premium; however, this premium may not be enough to offset a loss incurred by the Fund if the price of the reference asset is above the strike price by an amount equal to or greater than the premium. The value of an option may be adversely

affected if the market for the option becomes less liquid or smaller, and will be affected by changes in the value or yield of the option's reference asset, an increase in interest rates, a change in the actual or perceived volatility of the stock market or the reference asset and the remaining time to expiration. Additionally, the value of an option does not increase or decrease at the same rate as the reference asset.

Counterparty Credit Risk – The Fund may invest in financial instruments involving counterparties that attempt to gain exposure to a particular group of securities, index or asset class without actually purchasing those securities or investments, or to hedge a position. The Fund's use of such financial instruments, including swap agreements, involves risks that are different from those associated with direct transactions in portfolio securities. For example, the Fund is exposed to the risk that the counterparty may be unwilling or unable to make timely payments to meet its unsettled or open contractual obligations or may fail to return holdings that are subject to the agreement with the counterparty. If the counterparty becomes bankrupt or defaults on its payment obligations to the Fund, the Fund may not receive the full amount that it is entitled to receive. If this occurs, the value of your shares in the Fund will decrease. In addition, the Fund currently intends to engage in such investment transactions with a single counterparty, which increases the Fund's exposure to counterparty credit risk. The counterparties with which the Fund may transact generally are major, global financial institutions. The Fund bears the risk that those counterparties may be adversely affected by legislative or regulatory changes, adverse market conditions, increased competition, and/or wide scale credit losses resulting from financial difficulties or borrowers affecting the financial services sector.

Futures Contracts Risk – Futures contracts, or “futures,” provide for the future sale by one party and purchase by another party of a specified amount of a specific security or asset at a specified future time and at a specified price (with or without delivery required). Because futures require only a small initial investment in the form of a deposit or margin, they involve a high degree of leverage. Accordingly, the fluctuation of the value of futures in relation to the underlying assets upon which they are based is magnified. Thus, the Fund may experience losses that exceed losses experienced by funds that do not use futures contracts and which may be unlimited, depending on the structure of the contract.

Swap Agreements Risk – Swaps are agreements whereby two parties agree to exchange payment streams calculated by reference to an underlying asset, such as a rate, index, instrument or securities. Total return swaps give the Fund the right to receive the appreciation in the

value of a specified security, index or other instrument in return for a fee paid to the counterparty, which will typically be an agreed upon interest rate. If the underlying asset in a total return swap declines in value over the term of the swap, the Fund may also be required to pay the dollar value of that decline to the counterparty.

Large Capitalization Companies Risk – The risk that larger, more established companies may be unable to respond quickly to new competitive challenges such as changes in technology and consumer tastes. Larger companies also may not be able to attain the high growth rates of successful smaller companies.

Mid-Capitalization Companies Risk – The risk that mid-capitalization companies in which the Fund may invest may be more vulnerable to adverse business or economic events than larger, more established companies. In particular, mid-capitalization companies may have limited product lines, markets and financial resources and may depend upon a relatively small management group. Therefore, mid-capitalization stocks may be more volatile than those of larger companies. Mid-capitalization stocks may be traded over-the-counter or listed on an exchange.

Corporate Fixed Income Securities Risk – Corporate fixed income securities respond to economic developments, especially changes in interest rates, as well as perceptions of the creditworthiness and business prospects of individual issuers.

Interest Rate Risk – The risk that a change in interest rates will cause a fall in the value of fixed income securities, including U.S. Government securities, in which the Fund invests. Although U.S. Government securities are considered to be among the safest investments, they are not guaranteed against price movements due to changing interest rates.

Liquidity Risk – The risk that certain securities may be difficult or impossible to sell at the time and price that the Fund would like. The Fund may have to lower the price of the security, sell other securities instead or forego an investment opportunity, any of which could have a negative effect on Fund management or performance.

Active Management Risk – The Fund is subject to the risk that the Adviser's judgments about the attractiveness, value, or potential appreciation of the Fund's investments may prove to be incorrect. If the investments selected and strategies employed by the Fund fail to produce the intended results, the Fund could underperform in comparison to other funds with similar objectives and investment strategies.

Valuation Risk — The risk that a security may be difficult to value. The Fund may value certain securities at a price higher than the price at which they can be sold.

Supranational Entities Risk — Government members, or “stockholders,” usually make initial capital contributions to a supranational entity and in many cases are committed to make additional capital contributions if the supranational entity is unable to repay its borrowings. There is no guarantee, however, that one or more stockholders of the supranational entity will continue to make any necessary additional capital contributions. If such contributions are not made, the entity may be unable to pay interest or repay principal on its debt securities, and the Fund may lose money on such investments.

U.S. Government Securities Risk — Although U.S. Government securities are considered to be among the safest investments, they are not guaranteed against price movements due to changing interest rates. Obligations issued by some U.S. Government agencies are backed by the U.S. Treasury, while others are backed solely by the ability of the agency to borrow from the U.S. Treasury or by the agency’s own resources.

Municipal Securities Risk — Municipal securities, like other fixed income securities, rise and fall in value in response to economic and market factors, primarily changes in interest rates, and actual or perceived credit quality. Rising interest rates will generally cause municipal securities to decline in value. Longer-term securities respond more sharply to interest rate changes than do shorter-term securities. A municipal security will also lose value if, due to rating downgrades or other factors, there are concerns about the issuer’s current or future ability to make principal or interest payments. State and local governments rely on taxes and, to some extent, revenues from private projects financed by municipal securities, to pay interest and principal on municipal debt. Poor statewide or local economic results or changing political sentiments may reduce tax revenues and increase the expenses of municipal issuers, making it more difficult for them to meet their obligations. Actual or perceived erosion of the creditworthiness of municipal issuers may reduce the value of the Fund’s holdings. As a result, the Fund will be more susceptible to factors that adversely affect issuers of municipal obligations than a mutual fund that does not have as great a concentration in municipal obligations.

Duration Risk — The longer-term securities in which the Fund may invest tend to be more volatile than shorter-term securities. A portfolio

with a longer average portfolio duration is more sensitive to changes in interest rates than a portfolio with a shorter average portfolio duration.

Indexing Strategy/Index Tracking Risk — Certain Underlying Funds are managed with an indexing investment strategy, attempting to track the performance of an unmanaged index of securities, regardless of the current or projected performance of the underlying index (“Underlying Index”) or of the actual securities comprising the Underlying Index. This differs from an actively-managed fund, which typically seeks to outperform a benchmark index. As a result of its investment in such Underlying Funds, the Fund’s performance may be less favorable than that of a portfolio managed using a fully active investment strategy. The structure and composition of the Underlying Index will affect the performance, volatility, and risk of the Underlying Index and, consequently, the performance, volatility, and risk of the Fund. The performance of the portion of the Fund’s portfolio invested in such an Underlying Fund may not match the performance of the Underlying Fund’s Underlying Index for a number of reasons. For example, the Fund incurs a number of operating expenses not applicable to the Underlying Index, and incurs costs in buying and selling securities. In addition, the Fund may not be fully invested at times, generally as a result of cash flows into or out of the Fund or reserves of cash held by the Fund to meet redemptions.

Foreign Investment Risk — Investing in issuers located in foreign countries poses distinct risks because political and economic events unique to a country or region will affect those markets and their issuers. These events will not necessarily affect the U.S. economy or similar issuers located in the United States. In addition, investments in foreign countries are generally denominated in a foreign currency. As a result, changes in the value of those currencies compared to the U.S. dollar may affect (positively or negatively) the value of the Fund’s investments. These currency movements may happen separately from and in response to events that do not otherwise affect the value of the security in the issuer’s home country. Additionally, periodic U.S. Government restrictions on investments in issuers from certain foreign countries may result in the Fund having to sell such prohibited securities at inopportune times. Such prohibited securities may have less liquidity as a result of such U.S. Government designation and the market price of such prohibited securities may decline, which may cause the Fund to incur losses.

Asset-Backed Securities Risk — Asset-backed securities are securities backed by non-mortgage assets such as company receivables, truck and auto loans, leases and credit card receivables. Asset-backed securities

may be issued as pass-through certificates, which represent undivided fractional ownership interests in the underlying pools of assets. Therefore, repayment depends largely on the cash flows generated by the assets backing the securities. Asset-backed securities entail prepayment risk, which may vary depending on the type of asset, but is generally less than the prepayment risk associated with mortgage-backed securities. Asset-backed securities present credit risks that are not presented by mortgage-backed securities because asset-backed securities generally do not have the benefit of a security interest in collateral that is comparable in quality to mortgage assets. If the issuer of an asset-backed security defaults on its payment obligations, there is the possibility that, in some cases, the Fund will be unable to possess and sell the underlying collateral and that the Fund's recoveries on repossessed collateral may not be available to support payments on the security. In the event of a default, the Fund may suffer a loss if it cannot sell collateral quickly and receive the amount it is owed.

Mortgage-Backed Securities Risk — Mortgage-backed securities are affected by, among other things, interest rate changes and the possibility of prepayment of the underlying mortgage loans. Mortgage-backed securities are also subject to the risk that underlying borrowers will be unable to meet their obligations.

Prepayment Risk — The risk that, in a declining interest rate environment, fixed income securities with stated interest rates may have the principal paid earlier than expected, requiring the Fund to invest the proceeds at generally lower interest rates.

Extension Risk — The risk that rising interest rates may extend the duration of a fixed income security, typically reducing the security's value.

ETFs Risk — ETFs are pooled investment vehicles, such as registered investment companies and grantor trusts, whose shares are listed and traded on U.S. and non-U.S. stock exchanges or otherwise traded in the over-the-counter market. To the extent that the Fund invests in ETFs, the Fund will be subject to substantially the same risks as those associated with the direct ownership of the securities in which the ETF invests, and the value of the Fund's investment will fluctuate in response to the performance of the ETF's holdings. ETFs typically incur fees that are separate from those of the Fund. Accordingly, the Fund's investments in ETFs will result in the layering of expenses such that shareholders will indirectly bear a proportionate share of the ETFs' operating expenses, in addition to paying Fund expenses.

New Fund Risk – Because the Fund and the LGIMA Underlying Funds are new, investors in the Fund bear the risk that the Fund and the LGIMA Underlying Funds in which the Fund invests may not be successful in implementing their investment strategies, may not employ successful investment strategies, or may fail to attract sufficient assets under management to realize economies of scale, any of which could result in the Fund being liquidated at any time without shareholder approval and at a time that may not be favorable for all shareholders. Such liquidation could have negative tax consequences for shareholders and will cause shareholders to incur expenses of liquidation.

Performance Information

The Fund does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's returns and comparing the Fund's performance to a broad measure of market performance. Of course, the Fund's past performance (before and after taxes) does not necessarily indicate how the Fund will perform in the future.

Current performance information is available on the Fund's website at www.lgima.com/funds or by calling toll-free to 833-44-LGIMA.

Investment Adviser

Legal & General Investment Management America, Inc.

Portfolio Manager

David Chapman, Head of Multi-Asset Portfolio Management, has managed the Fund since its inception in 2022.

Purchase and Sale of Fund Shares

You may generally purchase or redeem shares on any day that the New York Stock Exchange ("NYSE") is open for business.

To purchase W Shares of the Fund for the first time, you must invest at least \$100 million. To purchase Institutional Shares of the Fund for the first time, you must invest at least \$1,000,000. There is no minimum for initial investments in R6 Shares of the Fund. There is no minimum for subsequent investments in any class of shares of the Fund.

The Fund reserves the right to change the amount of these minimums from time to time or to waive them in whole or in part.

If you own your shares directly, you may redeem your shares by contacting the Fund directly by mail at: LGIMA Funds, P.O. Box 219009, Kansas City, MO 64121-9009 (Express Mail Address: LGIMA Funds, c/o SS&C Global Investor & Distribution Solutions, Inc., 430 West 7th Street, Kansas City, MO 64105) or telephone at 833-44-LGIMA.

If you own your shares through an account with a broker or other financial intermediary, contact that broker or financial intermediary to redeem your shares. Your broker or financial intermediary may charge a fee for its services in addition to the fees charged by the Fund.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or individual retirement account ("IRA"), in which case your distribution will be taxed when withdrawn from the tax-deferred account.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's web site for more information.

MORE INFORMATION ABOUT THE FUND'S INVESTMENT OBJECTIVE AND PRINCIPAL INVESTMENT STRATEGIES

The investment objective of the Fund is to provide capital growth while limiting downside risk. The investment objective of the Fund is not a fundamental policy and may be changed by the Board of Trustees (the "Board") of The Advisors' Inner Circle Fund III (the "Trust") without shareholder approval.

The Fund seeks to achieve its investment objective primarily by investing in LGIMA Underlying Funds, with a target asset allocation strategy that emphasizes investments in equity securities in an amount equal to 60% of its assets and exposure to fixed-income securities in an amount equal to 40% of its assets. The Fund's equity component will also utilize an option collar strategy to attempt to mitigate losses in downward market cycles, as described in greater detail below.

The Fund's target asset allocation may differ from the Fund's actual asset allocation. These allocations will be reviewed periodically throughout the year to ensure any significant changes to the Adviser's market outlook are incorporated into the asset allocation. For example, the Adviser may seek to increase allocations to the equity asset class if the Adviser determines that such change will help achieve the Fund's return target in any given year, provided the Adviser believes that any additional portfolio risk from such increased allocation is appropriate and in line with the Adviser's then-current market assumptions, including estimates of expected market volatility and correlation across underlying assets. On the other hand, the Adviser may seek to increase allocations to the U.S. fixed income asset class to, for example, attempt to decrease volatility and preserve capital. Other considerations that the Adviser may take into account when developing and maintaining the Fund's portfolio in an attempt to achieve the Fund's investment objective include time to fund maturity, inflation, and market return expectations. Based on the Adviser's assessment of such considerations, the Adviser may make further adjustments that include modifying the existing allocations among asset classes or, among other things, maintaining asset allocations for longer or shorter periods of time.

The Fund's benchmark will be a custom blended benchmark comprised of 60% MSCI World Index/40% Bloomberg US Long Credit Index. With respect to its equity investments, the Fund will invest primarily in the Index Fund to passively track exposure to the securities included in the MSCI World Index, the Index Fund's primary benchmark index. Through its investments in the Index Fund, the Fund may gain exposure to equity securities, equity ETFs, equity futures and/or equity swaps, including

total return swaps. The Fund expects to gain exposure to derivatives that are primarily entered into on U.S. exchanges but may also be exposed to derivative transactions conducted outside of the U.S. In addition to its investments in the Index Fund, the Fund may also invest directly in ETFs and options for liquidity management purposes.

The Fund will also utilize an option collar strategy as an overlay to the entirety of the Fund's equity allocation. The Adviser expects that the option collar strategy will be utilized continuously in connection with its equity allocation. The purpose of the Fund's option collar strategy is to "hedge" or mitigate the risk of losses in downward market cycles associated with owning equity securities. This strategy will involve (i) selling covered call options on equity securities held indirectly by the Fund to generate premium from such options, while (ii) simultaneously purchasing put options on the same underlying equity securities held indirectly by the Fund. The optimal reference holdings for the option collar strategy are identified by utilizing references that are assigned the same exposure (i.e. by region and market capitalization) as the exposure held through the Index Fund, with consideration given to the liquidity of such related instruments. In other words, the Fund will use references for the option collar strategy that directly align with the Fund's exposure held through the Index Fund. The use of any options will be done to maintain a risk profile consistent with the Fund's investment objective, not for speculative purposes. The Fund may also invest in total return swaps to gain the same or similar investment exposure as the option collar strategy.

With respect to its fixed income investments, the Fund will invest primarily in the U.S. Credit Fund to provide overall diversification for the Fund's portfolio. Through its investments in the U.S. Credit Fund, the Fund may gain exposure to fixed income securities such as securities issued or guaranteed by the U.S. Government and its agencies or instrumentalities, municipal bonds, corporate bonds, supranational issuers (including emerging market issuers), asset-backed securities and mortgage-backed securities. In constructing the fixed income component of the Fund's portfolio through exposure to the U.S. Credit Fund, the Adviser's fixed income research analysts perform in-depth fundamental analysis and emphasize the following areas of focus in the research process: developing proprietary earnings models, forecasting free cash flow, analyzing asset valuations, and meeting with management. The Fund generally does not expect to hold any fixed income securities directly as part of its principal investment strategies.

The investments and strategies described in this prospectus are those that the Fund uses under normal conditions. During unusual economic

or market conditions, for temporary defensive or liquidity purposes, the Fund may, but is not obligated to, invest up to 100% of its assets in money market instruments and other cash equivalents that would not ordinarily be consistent with its investment objective. If the Fund invests in this manner, it may cause the Fund to forgo greater investment returns for the safety of principal and the Fund may therefore not achieve its investment objective. The Fund will only do so if the Adviser believes that the risk of loss outweighs the opportunity to pursue the Fund's investment objective.

This prospectus describes the Fund's principal investment strategies, and the Fund will normally invest in the types of securities and other investments described in this prospectus. In addition to the securities and other investments and strategies described in this prospectus, the Fund also may invest to a lesser extent in other securities, use other strategies and engage in other investment practices that are not part of its principal investment strategies. These investments and strategies, as well as those described in this prospectus, are described in detail in the Fund's Statement of Additional Information (the "SAI") (for information on how to obtain a copy of the SAI see the back cover of this prospectus). Of course, there is no guarantee that the Fund will achieve its investment goals.

MORE INFORMATION ABOUT PRINCIPAL RISKS

Investing in the Fund involves risk and there is no guarantee that the Fund will achieve its investment objective. The Adviser's judgments about the markets, the economy, or companies may not anticipate actual market movements, economic conditions or company performance, and these judgments may affect the return on your investment. You could lose money on your investment in the Fund, just as you could with other investments.

The value of your investment in the Fund is based on the value of the securities the Fund holds. These prices change daily due to economic and other events that affect particular companies and other issuers. These price movements, sometimes called volatility, may be greater or lesser depending on the types of securities the Fund owns and the markets in which the Fund trades. The effect on the Fund of a change in the value of a single security will depend on how widely the Fund diversifies its holdings.

Investment in Underlying Funds Risk – The Fund invests primarily in the Underlying Funds and therefore the Fund will be subject to substantially the same risks as those associated with the direct ownership of the

securities held by such Underlying Funds. As a shareholder of an Underlying Fund, the Fund relies on that Underlying Fund to achieve its investment objective. If the Underlying Fund fails to achieve its objective, the value of the Fund's investment could decline, which could adversely affect the Fund's performance. By investing in an Underlying Fund, Fund shareholders indirectly bear the Fund's proportionate share of the fees and expenses of the other Underlying Fund, in addition to the fees and expenses that Fund shareholders directly bear in connection with the Fund's own operations. The Fund does not intend to invest in an Underlying Fund unless the Adviser believes that the potential benefits of the investment justify the payment of any additional fees or expenses. Federal securities laws impose limitations on the Fund's ability to invest in the Underlying Funds.

Because closed-end funds and ETFs are listed on national stock exchanges and are traded like stocks listed on an exchange, their shares may trade at a discount or premium to their net asset value. Investments in closed-end funds and ETFs are also subject to brokerage and other trading costs, which could result in greater expenses to the Fund. In addition, because the value of closed-end funds and ETF shares depends on the demand in the market, the Adviser may not be able to liquidate the Fund's holdings at the most optimal time, which could adversely affect Fund performance.

Market Risk — The risk that the market value of an investment may move up and down, sometimes rapidly and unpredictably. The Fund's net asset value ("NAV") per share will fluctuate with the market prices of its portfolio securities. Market risk may affect a single issuer, an industry, a sector or the equity or bond market as a whole. Markets for securities in which the Fund invests may decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments that may cause broad changes in market value, public perceptions concerning these developments, and adverse investor sentiment or publicity. Similarly, the impact of any epidemic, pandemic or natural disaster, or widespread fear that such events may occur, could negatively affect the global economy, as well as the economies of individual countries, the financial performance of individual companies and sectors, and the markets in general in significant and unforeseen ways. Any such impact could adversely affect the prices and liquidity of the securities and other instruments in which the Fund invests, which in turn could negatively impact the Fund's performance and cause losses on your investment in the Fund. Recent examples include pandemic risks related to COVID-19 and aggressive measures taken worldwide in response by governments,

including closing borders, restricting international and domestic travel, and the imposition of prolonged quarantines of large populations, and by businesses, including changes to operations and reducing staff. The impact of the COVID-19 pandemic may be short term or may last for an extended period of time, and in either case could result in a substantial economic downturn or recession.

Equity Market Risk — Because the Fund may purchase equity securities, the Fund is subject to the risk that stock prices will fall over short or extended periods of time. Historically, the equity markets have moved in cycles, and the value of the Fund's securities may fluctuate drastically from day to day. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of securities issued by such companies may suffer a decline in response. In the case of foreign stocks, these fluctuations will reflect international economic and political events, as well as changes in currency valuations relative to the U.S. dollar. These factors contribute to price volatility.

Fixed Income Market Risk — The market values of fixed income investments change in response to interest rate changes and other factors. During periods of rising interest rates, the values of outstanding fixed income securities generally decrease. Moreover, while securities with longer maturities tend to produce higher yields, the prices of longer maturity securities are also subject to greater market value fluctuations as a result of changes in interest rates. During periods of falling interest rates, certain debt obligations with high interest rates may be prepaid (or "called") by the issuer prior to maturity, and during periods of rising interest rates, certain debt obligations with low interest rates may be extended beyond maturity. A rise in interest rates may also increase volatility and reduce liquidity in the fixed income markets, and result in a decline in the value of the fixed income investments held by the Fund. Reductions in dealer market-making capacity as a result of structural or regulatory changes could further decrease liquidity and/or increase volatility in the fixed income markets.

In addition to these risks, fixed income securities may be subject to credit risk, which is the possibility that an issuer will be unable or unwilling to make timely payments of either principal or interest.

Derivatives Risk — Derivatives are instruments that derive their value from an underlying security, financial asset or an index. Examples of derivative instruments include futures contracts, options and swaps. Changes in the market value of a security that is a reference asset for a derivative instrument may not be proportionate to changes in the

market value of the derivative instrument itself. There may not be a liquid market for the Fund to sell a derivative instrument, which could result in difficulty in closing the position. Moreover, certain derivative instruments can magnify the extent of losses incurred due to changes in the market value of the securities to which they relate. Some derivative instruments are subject to counterparty credit risk (as described below). The Fund's use of derivatives is also subject to leverage risk, lack of availability risk, valuation risk, correlation risk and tax risk. Leverage risk is the risk that a small percentage of assets invested in derivatives can have a disproportionately larger impact on the Fund's performance. Lack of availability risk is the risk that suitable derivative transactions may not be available in all circumstances for risk management or other purposes. Valuation risk is the risk that a particular derivative may be valued incorrectly. Correlation risk is the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index. Tax risk is the risk that the use of derivatives may cause the Fund to realize higher amounts of short-term capital gains, thereby increasing the amount of taxes payable by some shareholders. These risks could cause the Fund to lose more than the principal amount invested. Some derivatives have the potential for unlimited loss, regardless of the size of the Fund's initial investment. The Fund's counterparties to its derivative contracts present the same types of credit risk as issuers of fixed income securities. Additionally, regulation relating to the Fund's use of derivatives and related instruments, including Rule 18f-4 under the Investment Company Act of 1940, as amended (the "1940 Act"), could potentially limit or impact the Fund's ability to invest in derivatives, limit the Fund's ability to employ certain strategies that use derivatives and/or adversely affect the value of derivatives and the Fund's performance.

Derivatives are also subject to a number of other risks described elsewhere in this prospectus. Derivatives transactions conducted outside the U.S. may not be conducted in the same manner as those entered into on U.S. exchanges, and may be subject to different margin, exercise, settlement or expiration procedures. Derivatives transactions conducted outside the U.S. also are subject to the risks affecting foreign securities, currencies and other instruments, in addition to other risks.

Both U.S. and non-U.S. regulators have adopted and implemented regulations governing derivatives markets. The ultimate impact of the regulations remains unclear. Additional regulation of derivatives may make derivatives more costly, limit their availability or utility, limit or restrict their use by the Fund, otherwise adversely affect their performance or disrupt markets.

Futures Contracts Risk — Futures contracts, or “futures,” provide for the future sale by one party and purchase by another party of a specified amount of a specific security or asset at a specified future time and at a specified price (with or without delivery required). The risks of futures include (i) leverage risk; (ii) correlation or tracking risk; and (iii) liquidity risk. Because futures require only a small initial investment in the form of a deposit or margin, they involve a high degree of leverage. Accordingly, the fluctuation of the value of futures in relation to the underlying assets upon which they are based is magnified. Thus, the Fund may experience losses that exceed losses experienced by funds that do not use futures contracts and which may be unlimited, depending on the structure of the contract.

There may be imperfect correlation, or even no correlation, between price movements of a futures contract and price movements of investments for which futures are used as a substitute or which futures are intended to hedge. Lack of correlation (or tracking) may be due to factors unrelated to the value of the investments being substituted or hedged, such as speculative or other pressures on the markets in which these instruments are traded. Consequently, the effectiveness of futures as a security substitute or as a hedging vehicle will depend in part on the degree of correlation between price movements in the futures and price movements in underlying securities or assets. While futures contracts are generally liquid instruments, under certain market conditions they may become illiquid. Futures exchanges may impose daily or intra-day price change limits and/or limit the volume of trading. Additionally, government regulation may further reduce liquidity through similar trading restrictions. As a result, the Fund may be unable to close out its futures contracts at a time that is advantageous. If movements in the markets for security futures contracts or the underlying security decrease the value of the Fund’s positions in security futures contracts, the Fund may be required to have or make additional funds available to its carrying firm as margin. If the Fund’s account is under the minimum margin requirements set by the exchange or the brokerage firm, its position may be liquidated at a loss, and the Fund will be liable for the deficit, if any, in its account. The Fund may also experience losses due to systems failures or inadequate system back-up or procedures at the brokerage firm(s) carrying the Fund’s positions. The successful use of futures depends upon a variety of factors, particularly the ability of the Adviser to predict movements of the underlying securities markets, which requires different skills than predicting changes in the prices of individual securities. There can be no assurance that any particular futures strategy adopted will succeed.

Options Risk — An option is a contract between two parties for the purchase and sale of a financial instrument for a specified price at any time during the option period. Unlike a futures contract, an option grants the purchaser, in exchange for a premium payment, a right (not an obligation) to buy or sell a financial instrument. An option on a futures contract gives the purchaser the right, in exchange for a premium, to assume a position in a futures contract at a specified exercise price during the term of the option. The seller of an uncovered call (buy) option assumes the risk of a theoretically unlimited increase in the market price of the underlying security above the exercise price of the option. The securities necessary to satisfy the exercise of the call option may be unavailable for purchase except at much higher prices. Purchasing securities to satisfy the exercise of the call option can itself cause the price of the securities to rise further, sometimes by a significant amount, thereby exacerbating the loss. The buyer of a call option assumes the risk of paying an entire premium in the call option without ever getting the opportunity to execute the option. The seller (writer) of a covered put (sell) option (e.g., the writer has a short position in the underlying security) will suffer a loss if the increase in the market price of the underlying security is greater than the premium received from the buyer of the option. The seller of an uncovered put option assumes the risk of a decline in the market price of the underlying security below the exercise price of the option. The buyer of a put option assumes the risk of paying an entire premium in the put option without ever getting the opportunity to exercise the option. An option's time value (i.e., the component of the option's value that exceeds the in-the-money amount) tends to diminish over time. Even though an option may be in-the-money to the buyer at various times prior to its expiration date, the buyer's ability to realize the value of an option depends on when and how the option may be exercised. For example, the terms of a transaction may provide for the option to be exercised automatically if it is in-the-money on the expiration date. Conversely, the terms may require timely delivery of a notice of exercise, and exercise may be subject to other conditions (such as the occurrence or non-occurrence of certain events, such as knock-in, knock-out or other barrier events) and timing requirements, including the "style" of the option.

Collared Options Strategy Risk — Writing and buying options are speculative activities and entail greater than ordinary investment risks. The Fund's use of call and put options can lead to losses because of adverse movements in the price or value of the reference asset, which may be magnified by certain features of the options. When selling a call option, the Fund will receive a premium; however, this premium may not be enough to offset a loss incurred by the Fund if the price of

the reference asset is above the strike price by an amount equal to or greater than the premium. The value of an option may be adversely affected if the market for the option becomes less liquid or smaller, and will be affected by changes in the value or yield of the option's reference asset, an increase in interest rates, a change in the actual or perceived volatility of the stock market or the reference asset and the remaining time to expiration. Additionally, the value of an option does not increase or decrease at the same rate as the reference asset.

Swap Agreements Risk — Swaps are agreements whereby two parties agree to exchange payment streams calculated by reference to an underlying asset, such as a rate, index, instrument or securities. Swaps typically involve credit risk, market risk, liquidity risk and/or tax risk, which are described elsewhere in this section. Interest rate swaps involve one party, in return for a premium, agreeing to make payments to another party to the extent that interest rates exceed or fall below a specified rate (a “cap” or “floor,” respectively). Swap agreements involve the risk that the party with whom the Fund has entered into the swap will default on its obligation to pay the Fund and the risk that the Fund will not be able to meet its obligations to the other party to the agreement.

Total return swaps are contracts that obligate a party to pay interest in exchange for payment by the other party of the total return generated by a security, a basket of securities, an index or an index component. Total return swaps give the Fund the right to receive the appreciation in the value of a specified security, index or other instrument in return for a fee paid to the counterparty, which will typically be an agreed upon interest rate. If the underlying asset in a total return swap declines in value over the term of the swap, the Fund may also be required to pay the dollar value of that decline to the counterparty.

The Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”), which was signed into law on July 21, 2010, created a new statutory framework that comprehensively regulated the over-the-counter derivatives markets for the first time. Key Dodd-Frank Act provisions relating to over-the-counter derivatives require rulemaking by the U.S. Securities and Exchange Commission (the “SEC”) and the Commodity Futures Trading Commission (the “CFTC”) not all of which has been proposed or finalized as of the date of this prospectus. Prior to the Dodd-Frank Act, the over-the-counter derivatives markets were traditionally traded on a bilateral basis (so-called “bilateral OTC transactions”). Under the Dodd-Frank Act, certain over-the-counter derivatives transactions are now required to be centrally cleared and traded on exchanges or electronic trading platforms called swap

execution facilities (“SEFs”). Bilateral OTC transactions differ from exchange-traded or cleared derivatives transactions in several respects. Bilateral OTC transactions are transacted directly with dealers and not with a clearing corporation. As bilateral OTC transactions are entered into directly with a dealer, there is a risk of nonperformance by the dealer as a result of its insolvency or otherwise. Under regulations adopted by the CFTC and federal banking regulators, the Fund is required to post collateral (known as variation margin) to cover the mark-to-market exposure in respect of its uncleared swaps. These rules also mandate that collateral in the form of initial margin be posted to cover potential future exposure attributable to uncleared swap transactions for certain entities, which may include the Fund.

Counterparty Credit Risk — The Fund may invest in financial instruments involving counterparties that attempt to gain exposure to a particular group of securities, index or asset class without actually purchasing those securities or investments, or to hedge a position. The Fund’s use of such financial instruments, including swap agreements, involves risks that are different from those associated with direct transactions in portfolio securities. For example, the Fund is exposed to the risk that the counterparty may be unwilling or unable to make timely payments to meet its unsettled or open contractual obligations or may fail to return holdings that are subject to the agreement with the counterparty. If the counterparty becomes bankrupt or defaults on its payment obligations to the Fund, the Fund may not receive the full amount that it is entitled to receive. If this occurs, the value of your shares in the Fund will decrease. In addition, the Fund currently intends to engage in such investment transactions with a single counterparty, which increases the Fund’s exposure to counterparty credit risk. The counterparties with which the Fund may transact generally are major, global financial institutions. The Fund bears the risk that those counterparties may be adversely affected by legislative or regulatory changes, adverse market conditions, increased competition, and/or wide scale credit losses resulting from financial difficulties or borrowers affecting the financial services sector.

Large Capitalization Companies Risk — If valuations of large capitalization companies appear to be greatly out of proportion to the valuations of small or medium capitalization companies, investors may migrate to the stocks of small and medium-sized companies. Additionally, larger, more established companies may be unable to respond quickly to new competitive challenges such as changes in technology and consumer tastes. Larger companies also may not be able to attain the high growth rates of successful smaller companies.

Mid-Capitalization Companies Risk – The risk that mid-capitalization companies in which the Fund may invest may be more vulnerable to adverse business or economic events than larger, more established companies. In particular, mid-capitalization companies may have limited product lines, markets and financial resources and may depend upon a relatively small management group. Therefore, small capitalization and medium capitalization stocks may be more volatile than those of larger companies. Mid-capitalization stocks may be traded over-the-counter (“OTC”). OTC stocks may trade less frequently and in smaller volume than exchange listed stocks and may have more price volatility than that of exchange-listed stocks.

Corporate Fixed Income Securities Risk – Corporate fixed income securities are fixed-income securities issued by public and private businesses. Corporate fixed income securities respond to economic developments, especially changes in interest rates, as well as perceptions of the creditworthiness and business prospects of individual issuers. Corporate fixed income securities are subject to the risk that the issuer may not be able to pay interest or, ultimately, to repay principal upon maturity. Interruptions or delays of these payments could adversely affect the market value of the security. In addition, due to lack of uniformly available information about issuers or differences in the issuers’ sensitivity to changing economic conditions, it may be difficult to measure the credit risk of corporate securities.

Credit Risk – Credit risk is the risk that a decline in the credit quality of an investment could cause the Fund to lose money. The Fund could lose money if the issuer or guarantor of a portfolio security or a counterparty to a derivative contract fails to make timely payment or otherwise honor its obligations. Fixed income securities rated below investment grade (junk bonds) involve greater risks of default or downgrade and are generally more volatile than investment grade securities. Below investment grade securities involve greater risk of price declines than investment grade securities due to actual or perceived changes in an issuer’s creditworthiness. In addition, issuers of below investment grade securities may be more susceptible than other issuers to economic downturns. Such securities are subject to the risk that the issuer may not be able to pay interest or dividends and ultimately to repay principal upon maturity. Discontinuation of these payments could substantially adversely affect the market value of the security.

Interest Rate Risk – Interest rate risk is the risk that a change in interest rates will cause a fall in the value of fixed income securities, including U.S. Government securities, in which the Fund invests. Generally, the value of the Fund’s fixed income securities will vary inversely with

the direction of prevailing interest rates. Changing interest rates may have unpredictable effects on the markets and may affect the value and liquidity of instruments held by the Fund. In a low interest rate environment, risks associated with rising rates are heightened.

Liquidity Risk — Liquidity risk exists when particular investments are difficult to purchase or sell. The market for certain investments may become illiquid due to specific adverse changes in the condition of a particular issuer or under adverse market or economic conditions independent of the issuer. The Fund's investments in illiquid securities may reduce the returns of the Fund because it may be unable to sell the illiquid securities at an advantageous time or price. Further, transactions in illiquid securities may entail transaction costs that are higher than those for transactions in liquid securities.

Active Management Risk — The Fund is subject to the risk that the Adviser's judgments about the attractiveness, value, or potential appreciation of the Fund's investments may prove to be incorrect. If the investments selected and strategies employed by the Fund fail to produce the intended results, the Fund could underperform in comparison to other funds with similar objectives and investment strategies.

Supranational Debt Securities Risk — Investments in debt securities issued by governments or by government agencies and instrumentalities or supranational organizations involve the risk that the governmental entities responsible for repayment may be unable or unwilling to pay interest and repay principal when due. A governmental entity's willingness or ability to pay interest and repay principal in a timely manner may be affected by a variety of factors, including its cash flow, the size of its reserves, its access to foreign exchange, the relative size of its debt service burden to its economy as a whole, and political constraints. A governmental entity may default on its obligations or may require renegotiation or reschedule of debt payments. Any restructuring of a sovereign debt obligation held by the Fund will likely have a significant adverse effect on the value of the obligation. In the event of default of sovereign debt, the Fund may be unable to pursue legal action against the sovereign issuer or to realize on collateral securing the debt. The sovereign debt of many non-U.S. governments, including their sub-divisions and instrumentalities, is rated below investment grade. Sovereign debt risk may be greater for debt securities issued or guaranteed by emerging market countries.

U.S. Government Securities Risk — Although U.S. Government securities are considered to be among the safest investments, they

are not guaranteed against price movements due to changing interest rates. Obligations issued by some U.S. Government agencies are backed by the U.S. Treasury, while others are backed solely by the ability of the agency to borrow from the U.S. Treasury or by the agency's own resources. Therefore, such obligations are not backed by the full faith and credit of the U.S. Government.

Municipal Securities Risk — Municipal securities are fixed income securities issued by state or local governments or their agencies to finance capital expenditures and operations. The value of municipal securities can be significantly affected by actual or expected political and legislative changes. The obligation to pay principal and interest on municipal securities may be a general obligation of the state or local government or may be supported only by an agency or a particular source of revenues. Therefore, municipal securities vary in credit quality. Municipal securities, like other fixed income securities, rise and fall in value in response to economic and market factors, primarily changes in interest rates, and actual or perceived credit quality. Because many municipal securities are issued to finance projects in sectors such as education, health care, transportation and utilities, conditions in those sectors can affect the overall municipal market. State and local governments rely on taxes and, to some extent, revenues from private projects financed by municipal securities, to pay interest and principal on municipal securities. Poor federal, statewide or local economic results or changing political sentiments may reduce tax revenues and increase the expenses of municipal issuers, making it more difficult for them to meet their obligations. Negative events, such as severe fiscal difficulties, bankruptcy, an economic downturn, unfavorable legislation, court rulings or political developments, social conflict or unrest, labor disruption or natural disasters could impact the ability of issuers of municipal securities to repay principal and to make interest payments. Any changes in the financial condition of municipal issuers may also adversely affect the value of the Fund's securities.

Duration Risk — Duration is a measure of the expected life of a fixed income security that is used to determine the sensitivity of a security's price to changes in interest rates. For example, if a fixed income security has a five-year duration, it will decrease in value by approximately 5% if interest rates rise 1% and increase in value by approximately 5% if interest rates fall 1%. Fixed income instruments with higher duration typically have higher risk and higher volatility. Longer-term fixed income securities in which a portfolio may invest are more volatile than shorter-term fixed income securities. A portfolio with a longer average portfolio

duration is typically more sensitive to changes in interest rates than a portfolio with a shorter average portfolio duration.

Indexing Strategy/Index Tracking Risk — Certain Underlying Funds are managed with an indexing investment strategy, attempting to track the performance of an unmanaged index of securities, regardless of the current or projected performance of the underlying index (“Underlying Index”) or of the actual securities comprising the Underlying Index. This differs from an actively-managed fund, which typically seeks to outperform a benchmark index. As a result of its investment in certain Underlying Funds, the Fund’s performance may be less favorable than that of a portfolio managed using a fully active investment strategy. The structure and composition of the Underlying Index will affect the performance, volatility, and risk of the Underlying Index and, consequently, the performance, volatility, and risk of the Fund. The performance of the portion of the Fund’s portfolio invested in such an Underlying Fund may not match the performance of the Underlying Fund’s Underlying Index for a number of reasons. The Fund incurs a number of operating expenses not applicable to the Underlying Index, and incurs costs in buying and selling securities. In addition, the Fund may not be fully invested at times, generally as a result of cash flows into or out of the Fund or reserves of cash held by the Fund to meet redemptions. Changes in the composition of the Underlying Index and regulatory requirements also may impact the Fund’s ability to match the return of the Underlying Index. Index tracking risk may be heightened during times of increased market volatility or other unusual market conditions.

Foreign Investment Risk — Investing in issuers located in foreign countries poses distinct risks because political and economic events unique to a country or region will affect those markets and their issuers. These events will not necessarily affect the U.S. economy or similar issuers located in the United States. More specifically, investing in foreign issuers includes risks of adverse changes in foreign economic, political, regulatory and other conditions, changes in currency exchange rates or exchange control regulations (including limitations on currency movements and exchanges), differing accounting, auditing, financial reporting and legal standards and practices, differing securities market structures, and higher transaction costs. In certain countries, legal remedies available to investors may be more limited than those available with respect to investments in the U.S. In addition, the securities of some foreign companies may be less liquid and, at times, more volatile than securities of comparable U.S. companies. The Fund may also experience more rapid or extreme changes in value as compared to

a fund that invests solely in securities of U.S. companies because the securities markets of many foreign countries are relatively small and consist of a limited number of companies representing a small number of industries. Investing in foreign issuers also poses the risk that the cost of buying, selling and holding foreign securities, including brokerage, tax and custody costs, may be higher than the costs involved in domestic transactions. In addition, investments in foreign countries are generally denominated in a foreign currency. As a result, changes in the value of those currencies compared to the U.S. dollar may affect (positively or negatively) the value of the Fund's investments. These currency movements may happen separately from, and in response to, events that do not otherwise affect the value of the security in the issuer's home country. Additionally, periodic U.S. Government restrictions on investments in issuers from certain foreign countries may result in the Fund having to sell such prohibited securities at inopportune times. Such prohibited securities may have less liquidity as a result of such U.S. Government designation and the market price of such prohibited securities may decline, which may cause the Fund to incur losses.

Mortgage-Backed and Asset-Backed Securities Risk – Mortgage-backed securities are fixed income securities representing an interest in a pool of underlying mortgage loans. Mortgage-backed securities are sensitive to changes in interest rates, but may respond to these changes differently from other fixed income securities due to the possibility of prepayment of the underlying mortgage loans. As a result, it may not be possible to determine in advance the actual maturity date or average life of a mortgage-backed security. Rising interest rates tend to discourage re-financings, with the result that the average life and volatility of the security will increase, exacerbating its decrease in market price. When interest rates fall, however, mortgage-backed securities may not gain as much in market value because of the expectation of additional mortgage prepayments, which must be reinvested at lower interest rates.

Asset-backed securities are securities backed by non-mortgage assets such as company receivables, truck and auto loans, leases and credit card receivables. Asset-backed securities may be issued as pass-through certificates, which represent undivided fractional ownership interests in the underlying pools of assets. Therefore, repayment depends largely on the cash flows generated by the assets backing the securities. Asset-backed securities entail prepayment risk, which may vary depending on the type of asset, but is generally less than the prepayment risk associated with mortgage-backed securities. Asset-backed securities present credit risks that are not presented by mortgage-backed securities because asset-backed securities generally do not have the

benefit of a security interest in collateral that is comparable in quality to mortgage assets. If the issuer of an asset-backed security defaults on its payment obligations, there is the possibility that, in some cases, the Fund will be unable to possess and sell the underlying collateral and that the Fund's recoveries on repossessed collateral may not be available to support payments on the security. In the event of a default, the Fund may suffer a loss if it cannot sell collateral quickly and receive the amount it is owed.

Prepayment Risk — Fund investments in fixed income securities are subject to prepayment risk. In a declining interest rate environment, fixed income securities with stated interest rates may have their principal paid earlier than expected. This may result in a Fund having to reinvest that money at lower prevailing interest rates, which can reduce the returns of the Fund.

Extension Risk — Investments in fixed income securities are subject to extension risk. Generally, rising interest rates tend to extend the duration of fixed income securities, making them more sensitive to changes in interest rates. As a result, in a period of rising interest rates, the Fund may exhibit additional volatility.

ETFs Risk — The risks of owning interests of an ETF generally reflect the same risks as owning the underlying securities or other instruments that the ETF is designed to track. The shares of certain ETFs may trade at a premium or discount to their intrinsic value (i.e., the market value may differ from the net asset value ("NAV") of an ETF's shares). For example, supply and demand for shares of an ETF or market disruptions may cause the market price of the ETF to deviate from the value of the ETF's investments, which may be emphasized in less liquid markets. By investing in an ETF, the Fund indirectly bears the proportionate share of any fees and expenses of the ETF in addition to the fees and expenses that the Fund and its shareholders directly bear in connection with the Fund's operations.

New Fund Risk — Because the Fund and the LGIMA Underlying Funds are new, investors in the Fund bear the risk that the Fund and the LGIMA Underlying Funds in which the Fund invests may not be successful in implementing their investment strategies, may not employ successful investment strategies, or may fail to attract sufficient assets under management to realize economies of scale, any of which could result in the Fund being liquidated at any time without shareholder approval and at a time that may not be favorable for all shareholders. Such liquidation could have negative tax consequences for shareholders and will cause shareholders to incur expenses of liquidation.

INFORMATION ABOUT PORTFOLIO HOLDINGS

A description of the Fund's policies and procedures with respect to the circumstances under which the Fund discloses its portfolio holdings is available in the SAI. In addition to disclosure required by applicable law as discussed in the SAI, the Fund will post its complete portfolio holdings on the internet at www.lgima.com/funds within 30 days after the end of each month. The portfolio holdings information placed on the Fund's website generally will remain there until such information is included in a filing with the SEC. The Adviser may exclude any portion of the Fund's portfolio holdings from such publication when deemed in the best interest of the Fund. Nevertheless, as described in the SAI, the Fund will disclose its complete portfolio holdings quarterly, within 60 days of the end of each fiscal quarter.

INVESTMENT ADVISER

Legal & General Investment Management America, Inc., a Delaware corporation founded in 2006, is an SEC registered investment adviser that serves as the investment adviser to the Fund. The Adviser's principal place of business is located at 71 South Wacker Drive, Chicago, Illinois 60606. The Adviser is a wholly-owned subsidiary of Legal & General Investment Management United States (Holdings), Inc., a Delaware corporation and subsidiary of Legal & General Investment Management (Holdings) Ltd., a company incorporated under the laws of England and Wales, which in turn is a wholly-owned subsidiary of Legal & General Group PLC, a publicly-traded company in the United Kingdom. The Adviser provides investment management and investment advisory services to investment companies and other institutional and proprietary accounts, as more fully described in the Adviser's Form ADV. As of December 31, 2022 the Adviser had approximately \$200 billion in assets under management.

The Adviser makes investment decisions for the Fund and continuously reviews, supervises and administers the Fund's investment program. The Board supervises the Adviser and establishes policies that the Adviser must follow in its management activities.

In rendering investment advisory services to the Fund, the Adviser relies on a dual hatting agreement with LGIM International Limited ("LGIMI"), an affiliate of the Adviser registered with the SEC as an investment adviser, pursuant to which certain employees of LGIMI are permitted to provide trading services to the Fund. Under the dual hatting agreement, such employees and LGIMI are considered "associated persons," as that term is defined in the Investment Advisers Act of 1940, as amended

(the “Advisers Act”), of the Adviser, and the employees are subject to the control and supervision of the Adviser, and to the Adviser’s compliance policies and procedures and code of ethics, in connection with any services they provide to the Adviser’s clients.

For its services to the Fund, the Adviser is entitled to a fee, which is calculated daily and paid monthly, at an annual rate of 0.15% of the average daily net assets of the Fund.

The Adviser has contractually agreed to waive fees and reimburse expenses to the extent necessary to keep total annual Fund operating expenses (excluding interest, taxes, brokerage commissions, and other costs and expenses relating to the securities that are purchased and sold by the Fund, acquired fund fees and expenses, other expenditures which are capitalized in accordance with generally accepted accounting principles, and other non-routine expenses (collectively, “excluded expenses”)) from exceeding 0.00%, 0.05% and 0.10% of the Fund’s average daily net assets of the W Shares, Institutional Shares and R6 Shares, respectively (the “contractual expense limits”). This agreement may be terminated only by: the Board. In addition, the Adviser may receive from the Fund the difference between the total annual Fund operating expenses (not including excluded expenses) and the contractual expense limits to recoup all or a portion of its prior fee waivers or expense reimbursements made during the rolling three-year period preceding the date of the recoupment if at any point total annual Fund operating expenses (not including excluded expenses) are below the contractual expense limits (i) at the time of the fee waiver and/or expense reimbursement and (ii) at the time of the recoupment.

A discussion regarding the basis for the Board’s approval of the Fund’s investment advisory agreement will be available in the Fund’s first Annual or Semi-Annual Report to Shareholders.

PORTFOLIO MANAGER

David Chapman, Head of Multi-Asset Portfolio Management, serves as the sole Portfolio Manager of the Fund. Mr. Chapman has been employed by the Adviser since 2015. Prior to joining the Adviser, he served most recently as Chief Investment Officer at ALAS, Inc. from 2013 to 2015.

The SAI provides additional information about the portfolio manager’s compensation, other accounts managed, and ownership of Fund shares.

PURCHASING, SELLING AND EXCHANGING FUND SHARES

This section tells you how to purchase, sell (sometimes called “redeem”) and exchange Shares of the Fund.

For information regarding the federal income tax consequences of transactions in shares of the Fund, including information about cost basis reporting, see “Taxes.”

How to Choose a Share Class

The Fund offers three classes of shares to investors, W Shares, Institutional Shares and R6 Shares. Each share class has its own investment eligibility criteria, investment minimums, cost structure and other features. Contact your financial intermediary or the Fund for more information about the Fund’s share classes and how to choose between them.

Class Name	Eligible Investors	Investment Minimums	Features
W Shares	<ul style="list-style-type: none">• Defined contribution plans and their participants who meet the initial minimum investment• The Adviser and its affiliates	Initial: \$100,000,000 Subsequent: None	Shareholder Servicing Fee - Up to 0.10%
Institutional Shares	Defined contribution plans and their participants who meet the initial minimum investment	Initial: \$1,000,000 Subsequent: None	Shareholder Servicing Fee - Up to 0.15%
R6 Shares	Defined contribution plans and their participants	Initial: None Subsequent: None	Shareholder Servicing Fee - Up to 0.20%

An investor may be eligible to purchase more than one share class. However, if you purchase shares through a financial intermediary, you may only purchase that class of shares which your financial intermediary sells or services. Your financial intermediary can tell you which classes of shares of the Fund are available through the intermediary.

The Fund reserves the right to change the criteria for eligible investors in its sole discretion.

How to Purchase Fund Shares

To purchase shares directly from the Fund through its transfer agent, complete and send in the application. If you need an application or have questions, please call 833-44-LGIMA.

All investments must be made by check, Automated Clearing House (“ACH”), or wire. All checks must be made payable in U.S. dollars and drawn on U.S. financial institutions. The Fund does not accept purchases made by third-party checks, credit cards, credit card checks, cash, traveler’s checks, money orders or cashier’s checks.

The Fund reserves the right to reject any specific purchase order, including exchange purchases, for any reason. The Fund is not intended for short-term trading by shareholders in response to short-term market fluctuations. For more information about the Fund’s policy on short-term trading, see “Excessive Trading Policies and Procedures.”

The Fund does not generally accept investments by non-U.S. persons. Non-U.S. persons may be permitted to invest in the Fund subject to the satisfaction of enhanced due diligence. Please contact the Fund for more information.

By Mail

You can open an account with the Fund by sending a check and your account application to the address below. You can add to an existing account by sending the Fund a check and, if possible, the “Invest by Mail” stub that accompanies your confirmation statement. Be sure your check identifies clearly your name, your account number, the Fund name and the share class.

Regular Mail Address

LGIMA Funds
P.O. Box 219009
Kansas City, MO 64121-9009

Express Mail Address

LGIMA Funds
c/o SS&C Global Investor & Distribution Solutions, Inc.
430 West 7th Street
Kansas City, MO 64105

The Fund does not consider the U.S. Postal Service or other independent delivery services to be its agents. Therefore, deposit in the mail or with such services of purchase orders does not constitute receipt by the Fund's transfer agent. The share price used to fill the purchase order is the next price calculated by the Fund after the Fund's transfer agent receives and accepts the order in good order at the P.O. Box provided for regular mail delivery or the office address provided for express mail delivery.

By Wire

To open an account by wire, call 833-44-LGIMA for details. To add to an existing account by wire, wire your money using the wiring instructions set forth below (be sure to include the Fund name, the share class and your account number). The share price used to fill the purchase order is the next price calculated by the Fund after the Fund's transfer agent receives and accepts the wire in good order.

Purchases In-Kind

Subject to the approval of the Fund, an investor may purchase shares of the Fund with liquid securities and other assets that are eligible for purchase by the Fund (consistent with the Fund's investment policies and restrictions) and that have a value that is readily ascertainable in accordance with the Adviser's valuation policies. These transactions will be effected only if the Adviser deems the security to be an appropriate investment for the Fund. Assets purchased by a Fund in such transactions will be valued in good faith by the Adviser, subject to Board oversight. The Fund reserves the right to amend or terminate this practice at any time.

Minimum Purchases

To purchase W Shares of the Fund for the first time, you must invest at least \$100 million. To purchase Institutional Shares of the Fund for the first time, you must invest at least \$1,000,000. There is no minimum for initial investments in R6 Shares of the Fund. There is no minimum for subsequent investments in any class of shares of the Fund.

The Fund reserves the right to change the amount of these minimums from time to time or to waive them in whole or in part.

By Systematic Investment Plan (via ACH)

You may not open an account via ACH. However, once you have established a direct account with the Fund, you can set up an automatic investment plan via ACH by mailing a completed application to the Fund. These purchases can be made monthly, quarterly, semi-annually or annually in amounts of at least \$1. To cancel or change a plan, contact the Fund by mail at: LGIMA Funds, P.O. Box 219009, Kansas City, MO 64121-9009 (Express Mail Address: LGIMA Funds, c/o SS&C Global Investor & Distribution Solutions, Inc., 430 W 7th Street, Kansas City, MO 64105). Please allow up to 15 days to create the plan and 3 days to cancel or change it.

Fund Codes

The Fund's reference information, which is listed below, will be helpful to you when you contact the Fund to purchase or exchange shares, check daily NAV, or obtain additional information.

Share Class	Ticker Symbol	CUSIP	Fund Code
W Shares	LLFWX	00775Y454	7803
Institutional Shares	LLFIX	00775Y447	7804
R6 Shares	LLFZX	00775Y439	7805

General Information

You may generally purchase shares on any day that the NYSE is open for business (a "Business Day"). Shares cannot be purchased by Federal Reserve wire on days that either the NYSE or the Federal Reserve is closed.

The Fund's price per share will be the next determined NAV per share after the Fund or an authorized institution (as defined below) receives and accepts your purchase order in good order. "Good order" means that the Fund was provided with a complete and signed account application,

including the investor's social security number or tax identification number, and other identification required by law or regulation, as well as sufficient purchase proceeds. Purchase orders that are not in good order cannot be accepted and processed even if money to purchase shares has been submitted by wire, check or ACH.

The Fund calculates its NAV once each Business Day as of the close of normal trading on the NYSE (normally, 4:00 p.m., Eastern Time). To receive the current Business Day's NAV, the Fund or an authorized institution must receive and accept your purchase order in good order before the close of normal trading on the NYSE. If your purchase order is not received and accepted in good order before the close of normal trading on the NYSE, you will receive the NAV calculated on the subsequent Business Day on which your order is received and accepted in good order. If the NYSE closes early, as in the case of scheduled half-day trading or unscheduled suspensions of trading, the Fund reserves the right to calculate NAV as of the earlier closing time. The Fund will not accept orders that request a particular day or price for the transaction or any other special conditions. Shares will only be priced on Business Days. Since securities that are traded on foreign exchanges may trade on days that are not Business Days, the value of the Fund's assets may change on days when you are unable to purchase or redeem shares.

Buying or Selling Shares through a Financial Intermediary

In addition to being able to buy and sell Fund shares directly from the Fund through its transfer agent, you may also buy or sell shares of the Fund through accounts with financial intermediaries, such as brokers and other institutions that are authorized to place trades in Fund shares for their customers. When you purchase or sell Fund shares through a financial intermediary (rather than directly from the Fund), you may have to transmit your purchase and sale requests to the financial intermediary at an earlier time for your transaction to become effective that day. This allows the financial intermediary time to process your requests and transmit them to the Fund prior to the time the Fund calculates its NAV that day. Your financial intermediary is responsible for transmitting all purchase and redemption requests, investment information, documentation and money to the Fund on time. If your financial intermediary fails to do so, it may be responsible for any resulting fees or losses. Unless your financial intermediary is an authorized institution, orders transmitted by the financial intermediary and received by the Fund after the time NAV is calculated for a particular day will receive the following day's NAV.

Certain financial intermediaries, including certain broker-dealers and shareholder organizations, are authorized to act as agent on behalf of the Fund with respect to the receipt of purchase and redemption orders for Fund shares (“authorized institutions”). Authorized institutions are also authorized to designate other intermediaries to receive purchase and redemption orders on a Fund’s behalf. The Fund will be deemed to have received a purchase or redemption order when an authorized institution or, if applicable, an authorized institution’s designee, receives the order. Orders will be priced at the Fund’s next computed NAV after they are received by an authorized institution or an authorized institution’s designee. To determine whether your financial intermediary is an authorized institution or an authorized institution’s designee such that it may act as agent on behalf of the Fund with respect to purchase and redemption orders for Fund shares, you should contact your financial intermediary directly.

If you deal directly with a financial intermediary, you will have to follow its procedures for transacting with the Fund. Your financial intermediary may charge a fee for your purchase and/or redemption transactions. For more information about how to purchase or sell Fund shares through a financial intermediary, you should contact your financial intermediary directly.

How the Fund Calculates NAV

The NAV of a class of the Fund’s shares is determined by dividing the total value of the Fund’s portfolio investments and other assets attributable to the class, less any liabilities attributable to the class, by the total number of shares outstanding of the class.

In calculating NAV, the Fund generally values its investment portfolio at market price. If market prices are not readily available or they are unreliable, such as in the case of a security value that has been materially affected by events occurring after the relevant market closes, securities are valued at fair value. The Board has designated the Adviser as the Fund’s valuation designee to make all fair value determinations with respect to the Fund’s portfolio investments, subject to the Board’s oversight. The Adviser has adopted and implemented policies and procedures to be followed when making fair value determinations, and it has established a Valuation Committee through which the Adviser makes fair value determinations. The Adviser’s determination of a security’s fair value price often involves the consideration of a number of subjective factors, and is therefore subject to the unavoidable risk that the value that is assigned to a security may be higher or lower than the security’s value would be if a reliable market quotation for the security was readily available. The respective prospectuses for the

open-end investment companies in which the Fund invests explain the circumstances in which those investment companies will use fair value pricing and the effect of fair value pricing.

With respect to non-U.S. securities held by the Fund, the Adviser may take factors influencing specific markets or issuers into consideration in determining the fair value of a non-U.S. security. International securities markets may be open on days when the U.S. markets are closed. In such cases, the value of any international securities owned by a Fund may be significantly affected on days when investors cannot buy or sell shares. In addition, due to the difference in times between the close of the international markets and the time as of which the Fund prices its shares, the value the Adviser assigns to securities may not be the same as the quoted or published prices of those securities on their primary markets or exchanges. In determining fair value prices, the Adviser may consider the performance of securities on their primary exchanges, foreign currency appreciation/depreciation, securities market movements in the United States, or other relevant information related to the securities.

There may be limited circumstances in which the Fund would price securities at fair value for stocks of U.S. companies that are traded on U.S. exchanges – for example, if the exchange on which a portfolio security is principally traded closed early or if trading in a particular security was halted during the day and did not resume prior to the time the Fund calculated its NAV.

When valuing fixed income securities with remaining maturities of more than 60 days, the Fund uses the value of the security provided by pricing services. The values provided by a pricing service may be based upon market quotations for the same security, securities expected to trade in a similar manner or a pricing matrix. When valuing fixed income securities with remaining maturities of 60 days or less, the Fund may use the security's amortized cost. Amortized cost and the use of a pricing matrix in valuing fixed income securities are forms of fair value pricing.

Redeemable securities issued by open-end investment companies in which the Fund invests are valued at the investment company's applicable NAV.

Other assets for which market quotations are not readily available will be valued at their fair value as determined in good faith by the Adviser, subject to Board oversight.

How to Sell Your Fund Shares

If you own your shares directly, you may sell your shares on any Business Day by contacting the Fund directly by mail or telephone at 833-44-LGIMA.

If you own your shares through an account with a broker or other institution, contact that broker or institution to sell your shares. Your broker or institution may charge a fee for its services in addition to the fees charged by the Fund.

If you would like to have your redemption proceeds, including proceeds generated as a result of closing your account, sent to a third party or an address other than your own, please notify the Fund in writing.

Certain redemption requests will require a signature guarantee by an eligible guarantor institution. Eligible guarantors include commercial banks, savings and loans, savings banks, trust companies, credit unions, member firms of a national stock exchange, or any other member or participant of an approved signature guarantor program. For example, signature guarantees may be required if your address of record has changed in the last 30 days, if you want the proceeds sent to a bank other than the bank of record on your account, or if you ask that the proceeds be sent to a different person or address. Please note that a notary public is not an acceptable provider of a signature guarantee and that the Fund must be provided with the original guarantee. Signature guarantees are for the protection of Fund shareholders. Before granting a redemption request, the Fund may require a shareholder to furnish additional legal documents to ensure proper authorization.

Accounts held by a corporation, trust, fiduciary or partnership, may require additional documentation along with a signature guaranteed letter of instruction. The Fund participates in the Paperless Legal Program (the "Program"), which eliminates the need for accompanying paper documentation on legal securities transfers. Requests received with a Medallion Signature Guarantee will be reviewed for the proper criteria to meet the guidelines of the Program and may not require additional documentation. Please contact Shareholder Services at 833-44-LGIMA for more information.

The sale price of each share will be the next determined NAV after a Fund (or an authorized institution) receives and accepts your request in good order.

By Mail

To redeem shares by mail, please send a letter to the Fund signed by all registered parties on the account specifying:

- The Fund name;
- The share class;
- The account number;
- The dollar amount or number of shares you wish to redeem;
- The account name(s); and
- The address to which redemption (sale) proceeds should be sent.

All registered shareholders must sign the letter in the exact name(s) and must designate any special capacity in which they are registered.

Regular Mail Address

LGIMA Funds
P.O. Box 219009
Kansas City, MO 64121-9009

Express Mail Address

LGIMA Funds
c/o SS&C Global Investor & Distribution Solutions, Inc.
430 West 7th Street
Kansas City, MO 64105

The Fund does not consider the U.S. Postal Service or other independent delivery services to be their agents. Therefore, deposit in the mail or with such services of sell orders does not constitute receipt by the Fund's transfer agent. The share price used to fill the sell order is the next price calculated by the Fund after the Fund's transfer agent receives and accepts the order in good order at the P.O. Box provided for regular mail delivery or the office address provided for express mail delivery.

By Telephone

To redeem shares by telephone, you must first establish the telephone redemption privilege (and, if desired, the wire and/or ACH redemption privilege) by completing the appropriate sections of the account application. Call 833-44-LGIMA to redeem your shares. Based on your instructions, the Fund will mail your proceeds to you, or send them to your bank via wire or ACH.

By Systematic Withdrawal Plan (via ACH)

If you have a direct account with the Fund, you may transfer as little as \$1 per month from your account to another financial institution through a Systematic Withdrawal Plan (via ACH). The minimum balance requirements may be modified by the Fund in its sole discretion. To participate in this service, you must complete the appropriate sections of the account application and mail it to the Fund.

Receiving Your Money

Normally, the Fund will send your sale proceeds within one Business Day after it receives your redemption request. The Fund, however, may take up to seven days to pay redemption proceeds. Your proceeds can be wired to your bank account (may be subject to a \$10 fee), sent to you by check or sent via ACH to your bank account if you have established banking instructions with a Fund. **If you are selling shares that were recently purchased by check or through ACH, redemption proceeds may not be available until your check has cleared or the ACH transaction has been completed (which may take up to 15 days from your date of purchase).**

The Fund typically expects to sell portfolio assets and/or hold cash or cash equivalents to meet redemption requests. On a less regular basis, the Fund may also meet redemption requests by using short-term borrowings from its custodian and/or redeeming shares in-kind (as described below). These methods may be used during both normal and stressed market conditions.

Redemptions In-Kind

The Fund generally pays sale (redemption) proceeds in cash. However, under unusual conditions that make the payment of cash unwise and for the protection of the Fund's remaining shareholders, the Fund might pay all or part of your redemption proceeds in securities with a market value equal to the redemption price (redemption in-kind). If your shares were redeemed in-kind, you would have to pay transaction costs to sell the securities distributed to you, as well as taxes on any capital gains from the sale as with any redemption. In addition, you would continue to be subject to the risks of any market fluctuation in the value of the securities you receive in-kind until they are sold.

Involuntary Redemptions of Your Shares

If your account balance drops below \$1,000 because of redemptions, you may be required to sell your shares. The Fund generally will provide you at least 30 days' written notice to give you time to add to your

account and avoid the involuntary redemption of your shares. The Fund reserves the right to waive the minimum account value requirement in its sole discretion. If your shares are redeemed for this reason within 30 days of their purchase, the redemption fee will not be applied.

Suspension of Your Right to Sell Your Shares

The Fund may suspend your right to sell your shares or delay payment of redemption proceeds for more than seven days during times when the NYSE is closed, other than during customary weekends or holidays, or as otherwise permitted by the SEC. More information about this is in the SAI.

How to Exchange Your Fund Shares

At no charge, you may exchange W Shares, Institutional Shares or R6 Shares of the Fund for W Shares, Institutional Shares or R6 Shares, respectively, of another LGIMA Fund by writing to or calling the Fund. Exchanges are subject to the minimum investment requirements and the fees and expenses of the LGIMA Fund you exchange into. The LGIMA Funds may accept investments of smaller amounts in their sole discretion.

The exchange privilege is not intended as a vehicle for short-term or excessive trading. The Fund may suspend or terminate your exchange privilege if you engage in a pattern of exchanges that is excessive, as determined in the sole discretion of the Fund. For more information about the Fund's policy on excessive trading, see "Excessive Trading Policies and Procedures."

At no charge, you or your financial intermediary may convert one class of shares of the Fund directly to another class of shares of the Fund, by writing to or calling the Fund, subject to the eligibility requirements and the fees and expenses of the share class of the Fund you convert into.

Although the Fund expects that a conversion between share classes of the same Fund should ordinarily not result in the recognition of a gain or loss for federal income tax purposes, you should consult with your own tax adviser with respect to the federal, state and local tax treatment of your investment in the Fund and any share class conversions.

You may only exchange or convert shares between accounts with identical registrations (i.e., the same names and addresses). If you purchase shares through a financial intermediary, you may only exchange or convert into an LGIMA Fund or share class which your financial intermediary sells or services on the platform or program of the intermediary through which you own shares. Your financial intermediary

can tell you which LGIMA Funds and share classes are available through your platform or program.

Telephone Transactions

Purchasing, selling and exchanging Fund shares over the telephone is extremely convenient, but not without risk. Although the Fund has certain safeguards and procedures to confirm the identity of callers and the authenticity of instructions, the Fund is not responsible for any losses or costs incurred by following telephone instructions they reasonably believe to be genuine. If you or your financial institution transact with the Fund over the telephone, you will generally bear the risk of any loss.

PAYMENTS TO FINANCIAL INTERMEDIARIES

The Fund and/or the Adviser may compensate financial intermediaries for providing a variety of services to the Fund and/or its shareholders. Financial intermediaries include affiliated or unaffiliated brokers, dealers, banks (including bank trust departments), trust companies, registered investment advisers, financial planners, retirement plan administrators, insurance companies, and any other institution having a service, administration, or any similar arrangement with the Fund, their service providers or their respective affiliates. This section briefly describes how financial intermediaries may be paid for providing these services. For more information please see “Payments to Financial Intermediaries” in the SAI.

Shareholder Servicing Plan

The Fund has adopted a shareholder servicing plan that provides that the Fund may pay financial intermediaries for shareholder services in an annual amount not to exceed 0.10%, 0.15% and 0.20% based on the average daily net assets of the Fund’s W Shares, Institutional Shares and R6 Shares, respectively. The services for which financial intermediaries are compensated may include record-keeping, transaction processing for shareholders’ accounts and other shareholder services.

Payments by the Adviser

From time to time, the Adviser and/or its affiliates, in their discretion, may make payments to certain affiliated or unaffiliated financial intermediaries to compensate them for the costs associated with distribution, marketing, administration and shareholder servicing support for the Fund. These payments are sometimes characterized as “revenue sharing” payments and are made out of the Adviser’s

and/or its affiliates' own legitimate profits or other resources. Financial intermediaries include affiliated or unaffiliated brokers, dealers, banks (including bank trust departments), trust companies, registered investment advisers, financial planners, retirement plan administrators, insurance companies, and any other institution having a service, administration, or any similar arrangement with the Fund, its service providers or their respective affiliates. A financial intermediary may provide services with respect to Fund shares sold or held through programs such as retirement plans, qualified tuition programs, fund supermarkets, fee-based advisory or wrap fee programs, bank trust programs, and insurance (e.g., individual or group annuity) programs. In addition, financial intermediaries may receive payments for making shares of the Fund available to their customers or registered representatives, including providing the Fund with "shelf space," placing it on a preferred or recommended fund list, or promoting the Fund in certain sales programs that are sponsored by financial intermediaries. To the extent permitted by SEC and Financial Industry Regulatory Authority ("FINRA") rules and other applicable laws and regulations, the Adviser and/or its affiliates may pay or allow other promotional incentives or payments to financial intermediaries. For more information, please see "Payments to Financial Intermediaries" in the SAI.

The level of payments made by the Adviser and/or its affiliates to individual financial intermediaries varies in any given year and may be negotiated on the basis of sales of Fund shares, the amount of Fund assets serviced by the financial intermediary or the quality of the financial intermediary's relationship with the Adviser and/or its affiliates. These payments may be more or less than the payments received by the financial intermediaries from other mutual funds and may influence a financial intermediary to favor the sales of certain funds or share classes over others. In certain instances, the payments could be significant and may cause a conflict of interest for your financial intermediary. Any such payments will not change the NAV or price of the Fund's shares. Please contact your financial intermediary for information about any payments the intermediary may receive in connection with the sale of Fund shares or the provision of services to Fund shareholders.

In addition to these payments, your financial intermediary may charge you account fees, commissions, or transaction fees for buying or redeeming shares of the Fund, or other fees for servicing your account. Your financial intermediary should provide a schedule of its fees and services to you upon request.

OTHER POLICIES

Excessive Trading Policies and Procedures

The Fund is intended for long-term investment purposes only and discourages shareholders from engaging in “market timing” or other types of excessive short-term trading. This frequent trading into and out of the Fund may present risks to the Fund’s long-term shareholders and could adversely affect shareholder returns. The risks posed by frequent trading include interfering with the efficient implementation of the Fund’s investment strategies, triggering the recognition of taxable gains and losses on the sale of Fund investments, requiring the Fund to maintain higher cash balances to meet redemption requests, and experiencing increased transaction costs.

The Fund’s service providers will take steps reasonably designed to detect and deter frequent trading by shareholders pursuant to the Fund’s policies and procedures described in this prospectus and approved by the Board. For purposes of applying these policies, the Fund’s service providers may consider the trading history of accounts under common ownership or control. The Fund’s policies and procedures include:

- Shareholders are restricted from making more than 4 “round trips,” into or out of the Fund within any 1 year period. The Fund defines a “round trip” as a purchase or exchange into the Fund by a shareholder, followed by a subsequent redemption out of the Fund, of an amount the Adviser reasonably believes would be harmful or disruptive to the Fund.
- A redemption fee of 2.00% of the value of the shares sold will be imposed on shares redeemed within 30 days or less after their date of purchase (subject to certain exceptions as discussed below in “Redemption Fee”).
- The Fund reserves the right to reject any purchase or exchange request by any investor or group of investors for any reason without prior notice, including, in particular, if the Fund or the Adviser reasonably believes that the trading activity would be harmful or disruptive to the Fund.

The Fund and/or its service providers seek to apply these policies to the best of their abilities uniformly and in a manner they believe is consistent with the interests of the Fund’s long-term shareholders. The Fund does not knowingly accommodate frequent purchases and redemptions by Fund shareholders. Although these policies are designed to deter frequent trading, none of these measures alone

nor all of these measures taken together eliminate the possibility that frequent trading in the Fund will occur.

Financial intermediaries (such as investment advisers and broker-dealers) often establish omnibus accounts in the Fund for their customers through which transactions are placed. The Fund has entered into “information sharing agreements” with these financial intermediaries, which permit the Fund to obtain, upon request, information about the trading activity of the intermediary’s customers that invest in the Fund. If the Fund or its service providers identify omnibus account level trading patterns that have the potential to be detrimental to the Fund, the Fund or its service providers may, in their sole discretion, request from the financial intermediary information concerning the trading activity of its customers. Based upon a review of that information, if the Fund or its service providers determine that the trading activity of any customer may be detrimental to the Fund, they may, in their sole discretion, request the financial intermediary to restrict or limit further trading in the Fund by that customer. If the Fund is not satisfied that the intermediary has taken appropriate action, the Fund may terminate the intermediary’s ability to transact in Fund shares. When information regarding transactions in the Fund’s shares is requested by the Fund and such information is in the possession of a person that is itself a financial intermediary to a financial intermediary (an “indirect intermediary”), any financial intermediary with whom the Fund has an information sharing agreement is obligated to obtain transaction information from the indirect intermediary or, if directed by the Fund, to restrict or prohibit the indirect intermediary from purchasing shares of the Fund on behalf of other persons.

The Fund and its service providers will use reasonable efforts to work with financial intermediaries to identify excessive short-term trading in omnibus accounts that may be detrimental to the Fund. However, there can be no assurance that the monitoring of omnibus account level trading will enable the Fund to identify or prevent all such trading by a financial intermediary’s customers. Please contact your financial intermediary for more information.

Redemption Fee

In an effort to discourage short-term trading and defray costs incurred by shareholders as a result of short-term trading, the Fund charges a 2.00% redemption fee on redemptions (including exchanges) of shares that have been held for less than 30 days. The redemption fee is deducted from the Fund’s sale proceeds and cannot be paid separately, and any proceeds of the fee are credited to the assets of the Fund from

which the redemption was made. The fee does not apply to shares purchased with reinvested dividends or distributions. In determining how long shares of the Fund have been held, the Fund assumes that shares held by the investor the longest period of time will be sold first.

The redemption fee is applicable to Fund shares purchased either directly from the Fund or through a financial intermediary, such as a broker-dealer. Transactions through financial intermediaries typically are placed with the Fund on an omnibus basis and include both purchase and sale transactions placed on behalf of multiple investors. The Fund requests that financial intermediaries assess the redemption fee on customer accounts and collect and remit the proceeds to the Fund. However, the Fund recognizes that due to operational and systems limitations, intermediaries' methods for tracking and calculating the fee may be inadequate or differ in some respects from the Fund's. Therefore, to the extent that financial intermediaries are unable to collect the redemption fee, the Fund may not be able to defray the expenses associated with those short-term trades made by that financial intermediary's customers.

The Fund reserves the right to waive its redemption fee at its discretion when it believes such waiver is in the best interests of the Fund, including with respect to certain categories of redemptions that the Fund reasonably believes may not raise frequent trading or market timing concerns. These categories currently include, but are not limited to, the following: (i) participants in certain group retirement plans whose processing systems are incapable of properly applying the redemption fee to underlying shareholders; (ii) redemptions resulting from certain transfers upon the death of a shareholder; (iii) redemptions by certain pension plans as required by law or by regulatory authorities; (iv) systematic withdrawals; and (v) retirement loans and withdrawals.

Customer Identification and Verification

To help the government fight the funding of terrorism and money laundering activities, federal law requires all financial institutions to obtain, verify, and record information that identifies each person who opens an account.

What this means to you: when you open an account, the Fund will ask your name, address, date of birth, and other information that will allow the Fund to identify you. This information is subject to verification to ensure the identity of all persons opening a mutual fund account.

The Fund is required by law to reject your new account application if the required identifying information is not provided.

In certain instances, the Fund is required to collect documents to fulfill its legal obligation. Documents provided in connection with your application will be used solely to establish and verify your identity.

Attempts to collect the missing information required on the application will be performed by either contacting you or, if applicable, your broker or financial intermediary. If this information cannot be obtained within a reasonable timeframe established in the sole discretion of the Fund, your application will be rejected.

Subject to the Fund's right to reject purchases as described in this prospectus, upon receipt of your application in good order (or upon receipt of all identifying information required on the application), your investment will be accepted and your order will be processed at the next-determined NAV per share.

The Fund reserves the right to close or liquidate your account at the NAV next-determined and remit proceeds to you via check if it is unable to verify your identity. Attempts to verify your identity will be performed within a reasonable timeframe established in the sole discretion of the Fund. Further, the Fund reserves the right to hold your proceeds until your original check clears the bank, which may take up to 15 days from the date of purchase. In such an instance, you may be subject to a gain or loss on Fund shares and will be subject to corresponding tax implications.

Anti-Money Laundering Program

Customer identification and verification is part of the Fund's overall obligation to deter money laundering under federal law. The Fund has adopted an anti-money laundering compliance program designed to prevent the Fund from being used for money laundering or the financing of illegal activities. In this regard, the Fund reserves the right to: (i) refuse, cancel or rescind any purchase or exchange order; (ii) freeze any account and/or suspend account services; or (iii) involuntarily close your account in cases of threatening conduct or suspected fraudulent or illegal activity. These actions will be taken when, in the sole discretion of Fund management, they are deemed to be in the best interest of the Fund or in cases when the Fund is requested or compelled to do so by governmental or law enforcement authority. If your account is closed at the request of governmental or law enforcement authority, you may not receive proceeds of the redemption if the Fund is required to withhold such proceeds.

Unclaimed Property

Each state has unclaimed property rules that generally provide for escheatment (or transfer) to the state of unclaimed property under various circumstances. These circumstances include inactivity (e.g., no owner-initiated contact for a certain period), returned mail (e.g., when mail sent to a shareholder is returned by the post office, or “RPO,” as undeliverable), or a combination of both inactivity and returned mail. Once it flags property as unclaimed, the Fund will attempt to contact the shareholder, but if that attempt is unsuccessful, the account may be considered abandoned and escheated to the state.

Shareholders that reside in the state of Texas may designate a representative to receive escheatment notifications by completing and submitting a designation form that can be found on the website of the Texas Comptroller. While the designated representative does not have any rights to claim or access the shareholder’s account or assets, the escheatment period will cease if the representative communicates knowledge of the shareholder’s location and confirms that the shareholder has not abandoned his or her property. A completed designation form may be mailed to the Fund (if shares are held directly with the Fund) or to the shareholder’s financial intermediary (if shares are not held directly with the Fund).

More information on unclaimed property and how to maintain an active account is available through your state or by calling 833-44-LGIMA.

DIVIDENDS AND DISTRIBUTIONS

Generally, the Fund distributes its net investment income monthly and makes distributions of its net realized capital gains, if any, at least annually. If you own Fund shares on the Fund’s record date, you will be entitled to receive the distribution.

You will receive dividends and distributions in the form of additional Fund shares unless you elect to receive payment in cash. To elect cash payment, you must notify the Fund in writing prior to the date of the distribution. Your election will be effective for dividends and distributions paid after the Fund receives your written notice. To cancel your election, simply send the Fund written notice.

TAXES

Please consult your tax advisor regarding your specific questions about federal, state and local taxes. Below is a summary of some important U.S. federal income tax issues that affect the Fund and its

shareholders. This summary is based on current tax laws, which may change. This summary does not apply to shares held in an IRA or other tax-qualified plans, which are generally not subject to current tax. Transactions relating to shares held in such accounts may, however, be taxable at some time in the future.

The Fund intends to elect and to qualify each year for treatment as a regulated investment company (“RIC”). If it meets certain minimum distribution requirements, a RIC is not subject to tax at the fund level on income and gains from investments that are timely distributed to shareholders. However, the Fund’s failure to qualify as a RIC or to meet minimum distribution requirements would result (if certain relief provisions were not available) in fund-level taxation and, consequently, a reduction in income available for distribution to shareholders.

The Fund intends to distribute substantially all of its net investment income and net realized capital gains, if any. The dividends and distributions you receive may be subject to federal, state, and local taxation, depending upon your tax situation. Distributions you receive from the Fund may be taxable whether or not you reinvest them. Income distributions, including distributions of net short-term capital gains but excluding distributions of qualified dividend income, are generally taxable at ordinary income tax rates. Distributions reported by the Fund as long-term capital gains and as qualified dividend income are generally taxable at the rates applicable to long-term capital gains currently set at a maximum tax rate for individuals at 20% (lower rates apply to individuals in lower tax brackets). Qualified dividend income is, in general, dividend income from taxable domestic corporations and certain foreign corporations (e.g., foreign corporations incorporated in a possession of the United States or in certain foreign countries with a comprehensive tax treaty with the United States, or the stock of which is readily tradable on an established securities market in the United States). Distributions that the Fund receives from an underlying fund taxable as a RIC will be treated as qualified dividend income only to the extent so designated by such underlying fund. The Fund’s and certain Underlying Fund’s investment strategies may limit the Fund’s ability to distribute dividends eligible to be treated as qualified dividend income. Once a year the Fund (or its administrative agent) will send you a statement showing the types and total amount of distributions you received during the previous year.

You should note that if you purchase shares just before a distribution, the purchase price would reflect the amount of the upcoming distribution. In this case, you would be taxed on the entire amount of the distribution received, even though, as an economic matter, the distribution simply

constitutes a return of your investment. This is known as “buying a dividend” and should be avoided by taxable investors.

A RIC that receives business interest income may pass through its net business interest income for purposes of the tax rules applicable to the interest expense limitations under Section 163(j) of the Code. A RIC’s total “Section 163(j) Interest Dividend” for a tax year is limited to the excess of the RIC’s business interest income over the sum of its business interest expense and its other deductions properly allocable to its business interest income. A RIC may, in its discretion, designate all or a portion of ordinary dividends as Section 163(j) Interest Dividends, which would allow the recipient shareholder to treat the designated portion of such dividends as interest income for purposes of determining such shareholder’s interest expense deduction limitation under Section 163(j). This can potentially increase the amount of a shareholder’s interest expense deductible under Section 163(j). In general, to be eligible to treat a Section 163(j) Interest Dividend as interest income, you must have held your shares in the Fund for more than 180 days during the 361-day period beginning on the date that is 180 days before the date on which the share becomes ex-dividend with respect to such dividend. Section 163(j) Interest Dividends, if so designated by the Fund, will be reported to your financial intermediary or otherwise in accordance with the requirements specified by the IRS.

Each sale of Fund shares may be a taxable event. For tax purposes, an exchange of your Fund shares for shares of a different fund is the same as a sale. Assuming a shareholder holds Fund shares as capital assets, the gain or loss on the sale of Fund shares generally will be treated as a short-term capital gain or loss if you held the shares for 12 months or less or as long-term capital gain or loss if you held the shares for longer. Any loss realized upon a taxable disposition of Fund shares held for six months or less will be treated as long-term, rather than short-term, to the extent of any long-term capital gain distributions received (or deemed received) by you with respect to the Fund shares. All or a portion of any loss realized upon a taxable disposition of Fund shares will be disallowed if you purchase other substantially identical shares within 30 days before or after the disposition. In such a case, the basis of the newly purchased shares will be adjusted to reflect the disallowed loss.

U.S. individuals with income exceeding \$200,000 (\$250,000 if married and filing jointly) are subject to a 3.8% tax on their “net investment income,” including interest, dividends, and capital gains (including capital gains realized on the sale or exchange of shares of the Fund).

If the Fund's distributions exceed its accumulated earnings and profits for a taxable year (as calculated for federal income tax purposes), all or a portion of the distributions made in the taxable year may be recharacterized as a return of capital to shareholders. A return of capital distribution will not be taxable to the extent of a shareholder's adjusted basis but will reduce such basis and result in a higher capital gain or lower capital loss when those shares on which the distribution was received are sold. To the extent of a return of capital distribution exceeds a shareholder's adjusted basis, the distribution will be treated as capital gain from the sale of shares.

The Fund (or its administrative agent) must report to the Internal Revenue Service ("IRS") and furnish to Fund shareholders cost basis information for Fund shares. In addition to reporting the gross proceeds from the sale of Fund shares, the Fund (or its administrative agent) is also required to report the cost basis information for such shares and indicate whether these shares had a short-term or long-term holding period. For each sale of Fund shares, the Fund will permit shareholders to elect from among several IRS-accepted cost basis methods, including the average cost basis method. In the absence of an election, the Fund will use the average cost basis method as the default cost basis method. The cost basis method elected by the Fund shareholder (or the cost basis method applied by default) for each sale of Fund shares may not be changed after the settlement date of each such sale of Fund shares. Fund shareholders should consult their tax advisors to determine the best IRS-accepted cost basis method for their tax situation and to obtain more information about how cost basis reporting applies to them. Shareholders also should carefully review the cost basis information provided to them by the Fund and make any additional basis, holding period or other adjustments that are required when reporting these amounts on their federal income tax returns.

To the extent the Fund invests in foreign securities, it may be subject to foreign withholding taxes with respect to dividends or interest the Fund receives from sources in foreign countries. Foreign tax credits, if any, received by the Fund as a result of an investment in another RIC (including an ETF which is taxable as a RIC) will not be passed through to you unless the Fund qualifies as a "qualified fund-of-funds" under the Code. If the Fund is a "qualified fund-of-funds" it will be eligible to file an election with the IRS that will enable the Fund to pass along these foreign tax credits to its shareholders. The Fund will be treated as a "qualified fund-of-funds" under the Code if at least 50% of the value of the Fund's total assets (at the close of each quarter of the Fund's taxable year) is represented by interests in other RICs.

Because each shareholder's tax situation is different, you should consult your tax advisor about the tax implications of an investment in the Fund.

More information about taxes is included in the SAI.

ADDITIONAL INFORMATION

The Trust enters into contractual arrangements with various parties, including, among others, the Fund's investment adviser, custodian, transfer agent, accountants, administrator and distributor, who provide services to the Fund. Shareholders are not parties to, or intended (or "third-party") beneficiaries of, any of those contractual arrangements, and those contractual arrangements are not intended to create in any individual shareholder or group of shareholders any right to enforce the terms of the contractual arrangements against the service providers or to seek any remedy under the contractual arrangements against the service providers, either directly or on behalf of the Trust.

This prospectus and the SAI provide information concerning the Trust and the Fund that you should consider in determining whether to purchase shares of the Fund. The Fund may make changes to this information from time to time. Neither this prospectus, the SAI, or any document filed as an exhibit to the Trust's registration statement, is intended to, nor does it, give rise to an agreement or contract between the Trust or the Fund and any shareholder, or give rise to any contract or other rights in any individual shareholder, group of shareholders or other person other than any rights conferred explicitly by federal or state securities laws that may not be waived.

FINANCIAL HIGHLIGHTS

Because the Fund has not commenced operations as of the date of this prospectus, financial highlights for the Fund are not available.

Privacy Notice

This information is not part of the prospectus.

The Fund recognizes and respects the privacy concerns of its customers. The Fund collects nonpublic personal information about you in the course of doing business with shareholders and investors. "Nonpublic personal information" is personally identifiable financial information about you. For example, it includes information regarding your social security number, account balance, bank account information and purchase and redemption history.

The Fund collects this information from the following sources:

- Information we receive from you on applications or other forms;
- Information about your transactions with us and our service providers, or others;
- Information we receive from consumer reporting agencies (including credit bureaus).

What information the Fund discloses and to whom the Fund discloses information.

The Fund only discloses nonpublic personal information the Fund collects about shareholders as permitted by law. For example, the Fund may disclose nonpublic personal information about shareholders:

- To government entities, in response to subpoenas or to comply with laws or regulations.
- When you, the customer, direct the Fund to do so or consent to the disclosure.
- To companies that perform necessary services for the Fund, such as shareholder servicing centers that the Fund uses to process your transactions or maintain your account.
- To protect against fraud, or to collect unpaid debts.

Information about former customers.

If you decide to close your account(s) or become an inactive customer, we will adhere to the privacy policies and practices described in this notice.

How the Fund safeguards information.

The Fund conducts its business affairs through trustees, officers and third parties that provide services pursuant to agreements with the Fund (for example, the service providers described above). We restrict access to your personal and account information to those persons who need to know that information in order to provide services to you. The Fund or its service providers maintain physical, electronic and procedural safeguards that comply with federal standards to guard your nonpublic personal information.

Customers of other financial institutions.

In the event that you hold shares of the Fund through a financial intermediary, including, but not limited to, a broker-dealer, bank or trust company, the privacy policy of your financial intermediary will govern how your non-public personal information will be shared with non-affiliated third parties by that entity.

THE ADVISORS' INNER CIRCLE FUND III

Legal & General Long Life Fund

Investment Adviser

Legal & General Investment Management America, Inc.
71 South Wacker Drive
Chicago, Illinois 60606

Distributor

SEI Investments Distribution Co.
One Freedom Valley Drive
Oaks, Pennsylvania 19456

Legal Counsel

Morgan, Lewis & Bockius LLP
1701 Market Street
Philadelphia, Pennsylvania 19103

More information about the Fund is available, without charge, through the following:

Statement of Additional Information ("SAI"): The SAI, dated March 1, 2023, as it may be amended from time to time, includes detailed information about the Legal & General Long Life Fund and The Advisors' Inner Circle Fund III. The SAI is on file with the U.S. Securities and Exchange Commission (the "SEC") and is incorporated by reference into this prospectus. This means that the SAI, for legal purposes, is a part of this prospectus.

Annual and Semi-Annual Reports: Once available, these reports will list the Fund's holdings and contain information from the Adviser about investment strategies, and recent market conditions and trends and their impact on Fund performance. The reports will also contain detailed financial information about the Fund.

To Obtain an SAI, Annual or Semi-Annual Report (When Available), or More Information:

By Telephone: 833-44-LGIMA

By Mail: LGIMA Funds
P.O. Box 219009
Kansas City, MO 64121-9009

By Internet: www.lgima.com/funds

From the SEC: You can also obtain the SAI or the Annual and Semi-Annual Reports, as well as other information about The Advisors' Inner Circle Fund III, from the EDGAR Database on the SEC's website at: <http://www.sec.gov>. You may also obtain this information, upon payment of a duplicating fee, by e-mailing the SEC at the following address: publicinfo@sec.gov.

The Trust's Investment Company Act registration number is 811-22920.
